

Experience Over the Years at the Field of Commissioning

ABOUT US

DKY Engineering and Consulting

DKY Engineering offers a range of products, services and technical solutions in the Energy Management, Commissioning and TAB industries to support secure, reliable and high-performing assets and services. In 2019, DKY built an outstanding reputation for providing excellent products and services, including TAB studies and commissioning.

The value created from their commitment, market knowledge and technical expertise has enabled them to support their customers and their projects and translate into outstanding success and growth. Success is not just about achieving high growth, the important thing is to strive to provide a quality and stable service in order to continue the success stories.

OUR OBJECTIVES

International Standard On Quality

We offer reliable and creative engineering solutions that meet international quality standards, mechanical project and contracting services in projects that require comprehensive and expertise in every aspect. We are based on respect for people and nature in every step we take, and we believe in the importance of adding value to the society and all our business partners.

Social Responsibility

We ensure sustainability in our social responsibility projects, particularly in the areas of education and the arts, in an effort to contribute to the development and modernization of our society.

Reliable and Quality Service

By offering very reliable and top quality services to our customer, HARVEN ENGINEERING aims to become the most preferred electromechanical company, maintain its lean and key position by establishing sustainable relations with its material and service providers based on trust and mutual benefits and attain the project sustainability through an efficient risk and cost management.
